

PRODUCTS & SERVICES

CRANES/HOISTS

- Bridge Cranes -100# - 100T
- Jib Cranes
- Gantry Cranes
- Wire Rope Hoists
- Chain Hoists
- Winches
- Overhead Monorails
- Stacker Cranes
- Overhead Chain Conveyors
- Enclosed Chain Conveyors
- Lifting Attachments - Mechanical
- Lifting Devices - Vacuum
- Robotics

STORAGE

- Automated Storage & Retrieval (AS/R)
- Pallet Rack
- Pallet Flow Rack
- Automatic Guided Vehicles (AGV)
- Drive Through Rack
- Drive In Rack
- Static Shelving
- Case Flow Rack
- Technical Work Tables
- Mezzanines

ERGONOMICS

- Vacuum Lifting Devices
- Tilt Tables
- Hydraulic Lift Tables
- Work Positioners
- Electric Work Platforms
- Manipulators
- Drum Handling Equipment

CONVEYORS

- Horizontal Belt Conveyors
- Incline Belt Conveyors
- Powered Belt Conveyors
- Powered Accumulating Conveyors
- Gravity Roller Conveyors
- Chain Driven Conveyors
- Vertical Lift Equipment
- Bulk Handling
- Vibratory Conveying
- Vertical Conveyors (VRC/CVC)
- Powered Turns
- Powered Turntables
- Drag Chain Conveyors

PACKING & SHIPPING

- Bagging
- Palletizing
- Stretch Wrapping Systems
- Shrink Wrapping Systems

DOCK EQUIPMENT

- Dock Levelers
- Dock Boards
- Dock Seals
- Dock Shelters
- Edge of Dock Levelers
- High Speed Doors

AUTOMATION

- Control Panels
- Manual Controls
- Automatic Controls
- Bar Code Logic
- PLC Control Logic

CRANE EQUIPMENT & SYSTEMS

- Electric Chain Hoists (All Capacities In-Stock)
- Wire Rope Hoists (Most Capacities In-Stock)
- Crane & Hoist Installation
- Crane Systems & Runways
- Crane System Relocation
- Crane and Hoist Modernizations
- Light Workstation Cranes
- Runway Installations & Extensions
- Runway Electrification Systems
- Remote Control Systems
- Engineered Capacity Upgrades
- Engineering Studies
- Below the Hook Devices
- Cranes & Hoist Parts (All Brands)

AC&AH is an independent authorized service center for Roach Conveyors, Demag Cranes and Components, R & M, Diamond Phoenix and many other material handling manufacturers.

Material Handling Systems Programs For Maintenance, Repair Or Inspections.

Maximize your equipment investment, limit risks and Stay in compliance with U.S., state, and local laws.

Your overhead cranes, conveyors, motors, controls, and hoists are complex pieces of equipment that require ongoing maintenance, frequent and periodic inspections as well as proper repairs to remain in a productive and safe condition.

Many crane and conveyor owners understand that their own in-house maintenance personnel lack the highly specialized skills and expertise required to safely maintain and repair their material handling equipment. Using their in-house maintenance departments to work on material handling equipment is simply too great a safety and liability risk. For example most companies have service contracts for their fork trucks. You owe it to your company/employees to provide the same level of compliance and safety for your cranes and conveyors.

ATLANTA CRANE & AUTOMATED HANDLING, INC (AC&AH) inspectors and technicians are highly skilled on all facets of cranes, conveyors, controls, motor inspection and repairs. Not only will we repair your equipment correctly, we will save you money, production time, and most importantly worry.

This is so important that OSHA, the enforcement agency of compliance, mandates crane and hoist inspection compliance per OSHA 1910.179, Section J.

SERVICES

- OSHA Compliance Inspections
- Custom Maintenance Programs
- Proof (Certified) Load Testing
- 24-Hour Emergency Service
- Elect. & Mech. Troubleshooting for Crane and Conveyor Systems
- Emergency & Planned Repairs
- Runway Surveys & Alignment
- Conveyor Surveys and Belt Tracking
- On-Site Staffing Agreements
- Crane & Hoist Parts (All Brands)
- Conveyor Belting & Parts for All Brands
- Crane Operator Training Classes
- Conveyor Safety Reviews and Maintenance Training

AC&AH represents equipment from leading manufacturers of cranes, conveyors, motors, controls and hoists; we offer complete design engineering and turn-key installations; from a single source.

AC&AH is the service organization leading the southeast in cost saving approaches to improve the safety and productivity of your material handling equipment. We are the only company that can provide full material handling expertise and maintenance solution for cranes, conveyors, hoists, controls, and motors.

We offer multiple solutions for emergency response times in the entire southeast region. In addition, we have annual contracts for many other areas of the continental United States. We do complete overhauls, rebuilds, and replacement of both cranes and conveyors of any make or manufacture.

When you are looking for a new conveyor, crane, hoist, or even more precise speed controls you should turn to AC&AH. If it is an engineered modernization of existing equipment or a complete crane or conveyor system, you can rely on the experts at AC&AH to analyze your application discuss your needs and supply quality equipment. We are so sure of our solutions that we offer warranties for as long as 5 years on many systems.

The equipment that we offer is from the most respected companies in the industry and is of the highest durability offered. We will recommend the proper equipment to fit your application and/or repairs. The equipment that we recommend for your facility is the same that we use in our assembly process.

AC&AH uses our own personnel for all phases of your project. You won't find anyone pointing fingers or blaming another contractor when you invest in AC&AH. It is our people, our installation teams and our project teams ensuring a quality job and proper completion of your system. We do continuing education within all of our departments to stay on top of the changing material handling world.

Systems Integration

All elements of material handling, storage, retrieval, materials management and packaging are considered. This yields comprehensive documentation, resulting in the development of workable systems. While many equipment manufacturers excel in providing product for a given task, few provide the entire span of equipment that is necessary for a versatile system — herein lays our main strength. We can integrate different equipment (while retaining manufacturer warranty, service and technical support) into systems that are fully documented and supported for the long term.
